DETAILED ACTION

1. The disclosure is objected to because of the following informalities: in the brief description of the drawings on pages 9-10, Figs. 2A-2D, 5A-5D, 8A-8D, and 9A-9B should be described

Appropriate correction is required.

2. Figures 8A-9B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Applicant is advised that should claims 1-5 be found allowable, claims 6-10 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 2125

5. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 7, it is uncertain what the term "line/space" represents and lines 8,9, and 30 which also mention lines, spaces, and lines add additional uncertainty as to what the term "line/space" means. Claim 4, line 3, has a similar problem.

Claim 1, line 30, both "the reference region" and " the lines" lack a clear antecedent basis.

Claims 6 and 9 and problems similar to those of claims 1 and 4.

The remaining claims fall with the parent claims.

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-4 and 6-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morita 6,905,966.

Morita teaches forming a film on a substrate, forming a mask pattern, etching, applying an isolation film, polishing the surface, (col. 2, lines 31-48) use of an area ratio (col. 2, lines 49-60), estimating the remaining thickness (col. 2, lines 61-67), measuring at a plurality of points (col. 8, lines 1-8), and determining a relationship (col. 8, lines 13-16). Morita also teaches the use of oxide film, CMP, predetermined regions, and a

silicon nitride film. See the abstract; figures; col. 2, lines 31-67; col. 4, line 1 to col. 5, line 46; col. 7, line 46 to col. 10, line 12; and the claims.

Morita however does not specify the combination of defining each of reference regions having a predetermined shape and that the measurement points are placed in the center thereof.

It would have been obvious to one of ordinary skill in the art to place the measurement point in the center of the predetermined regions so that an accurate estimate is generated.

8. Claims 5 and 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shinkawata 6,690,045 is of interest in the use of dummy patterns. Morita 2004/0121613 is of interest in estimating layer thickness.
